NEVER TOUCH A RUPTURED BATTERY

THE HEAT AND/OR CHEMICALS CAN CAUSE SEVERE BURNS

LITHIUM-ION BATTERIES CAN UNEXPECTEDLY RE-IGNITE AFTER ALL VISIBLE FIRE HAS BEEN PUT OUT

WHEN FLYING, REMOVE BATTERIES FROM CHECKED BAGS. KEEP THEM WITH YOU ON THE PLANE

FIRE EXTINGUISHERS DO NOT WORK ON LITHIUM-ION BATTERIES FIRES

OVER FIVE YEARS, THERE HAVE BEEN 25,000 INCIDENTS OF LITHIUM-ION BATTERIES CATCHING ON FIRE/OVERHEATING

A LITHIUM-ION FIRE EXTINGUISHED WITH WATER MAY **REIGNITE**

IF YOU OBSERVE A LITHIUM-ION FIRE, LEAVE THE AREA, CLOSE THE DOOR, AND CALL 9-1-1

EV FIRES BURN AT ~ 5,000°F, MORE THAN THREE TIMES HOTTER THAN A STANDARD VEHICLE FIRE
